Whey processing lines (ricotta production)

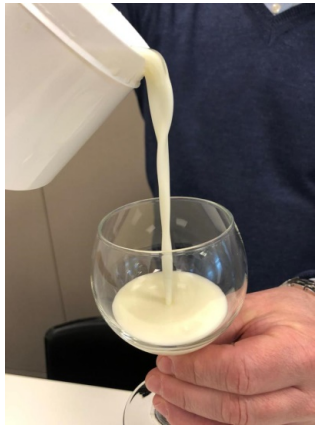

fraugroup
foodandbeverageprocessing

Membrane Concentration Plants
cheese and curd whey

The lines are equipped with
an automatic nanofiltration
unit / osmose / ultrafiltration
Delivered on request
with technological support to
create drinking yoghurts,
desserts and cream cheeses

fraugroup
foodandbeverageprocessing

Automatic multi-route CIP stations

We produce multi-lines washing stations with 1 to 10 independent lines capacity from 10.000 l/h to 60.000 l/h
Included tank for acid, alkali, water, return water, disinfectant
Peculiarities:
automatic maintenance of the concentration of solutions, automatic dosing of concentrated solutions, variable performance
all functions with automatic control

fraugroup
foodandbeverageprocessing

Technological lines for equipping FRAUGROUP ice cream production:

We produce automatic lines for the preparation of ice cream mixture, its pasteurization and maturation

In the photo: the workshop for the preparation of a mixture for ice cream

fraugroup

foodandbeverageprocessing

Blending and syrup rooms for preparing soft drinks

We produce automatic lines for the recovery of juice from concentrate, blending of the finished drink and its pasteurization and / or Ice coffee, cappuccino, espresso cold drinks

fraugroup
foodandbeverageprocessing

Microbreweries FRAUGROUP:

We offer compact brew houses for medium and small businesses in various configurations for 2/3/4 vats from 500L to 5000L.
Complete with all elements of complementary equipment, including on request. The level of automation is determined in cooperation with the customer and serves to optimize high-performance production, where great attention is paid to process repeatability and time optimization with an extended product range.

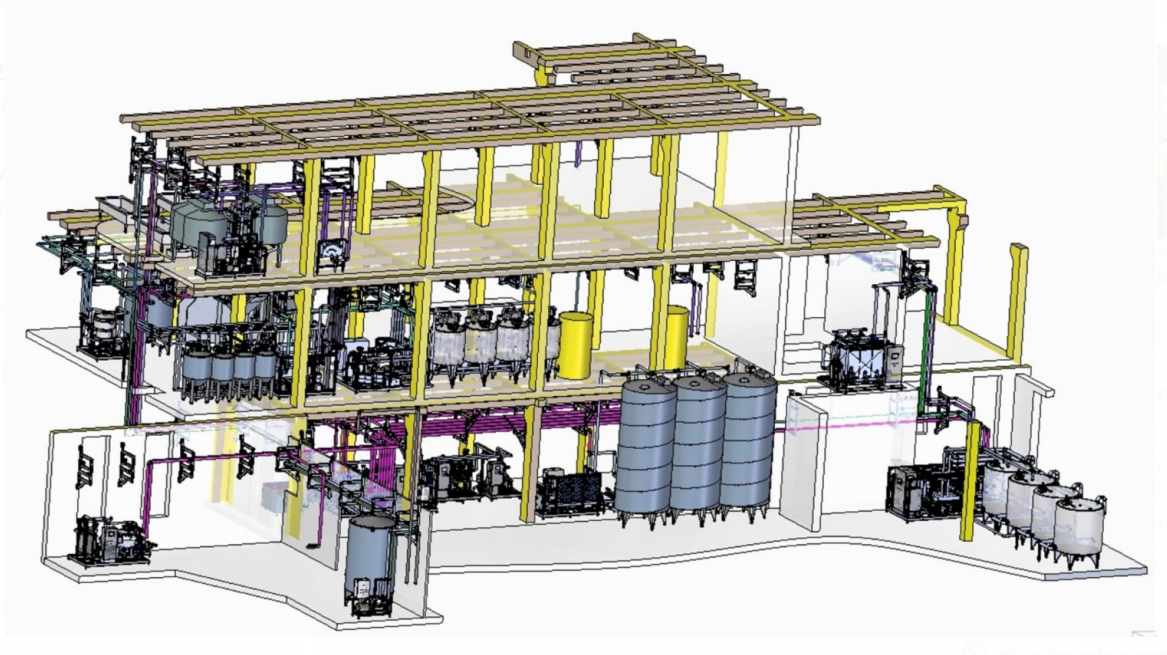

fraugroup
foodandbeverageprocessing

FRAUGROUP not only manufactures most of the equipment of the line, but implements the technologies requested by the buyer, also offering its own interesting developments.

And not only delivers, assembles, puts the equipment into operation, but also takes responsibility for the quality of the products received, for the declared shelf life, for the output of the line to production capacity.

fraugroup
foodandbeverageprocessing

Our distinctive feature

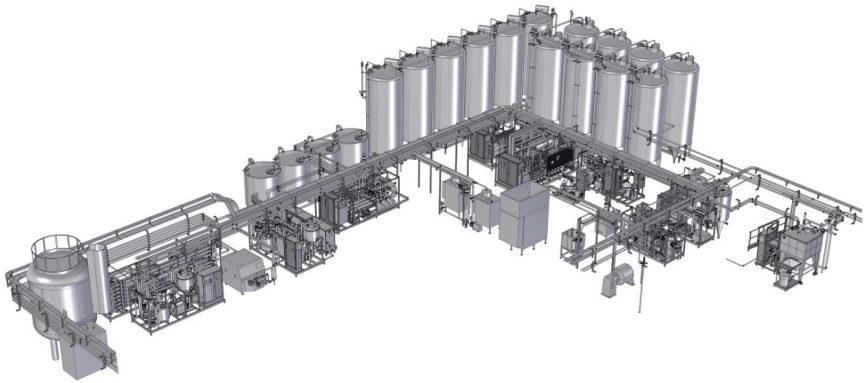

We will be happy to offer you our concept, make technological calculations for a business plan, and you will be able to accurately calculate the expected profit. We know how to organize waste-free, lean and energy-efficient production.

At your request, it is possible to introduce new types of products (including using non-traditional European recipes for your market) under the brand of your company.

fraugroup
foodandbeverageprocessing

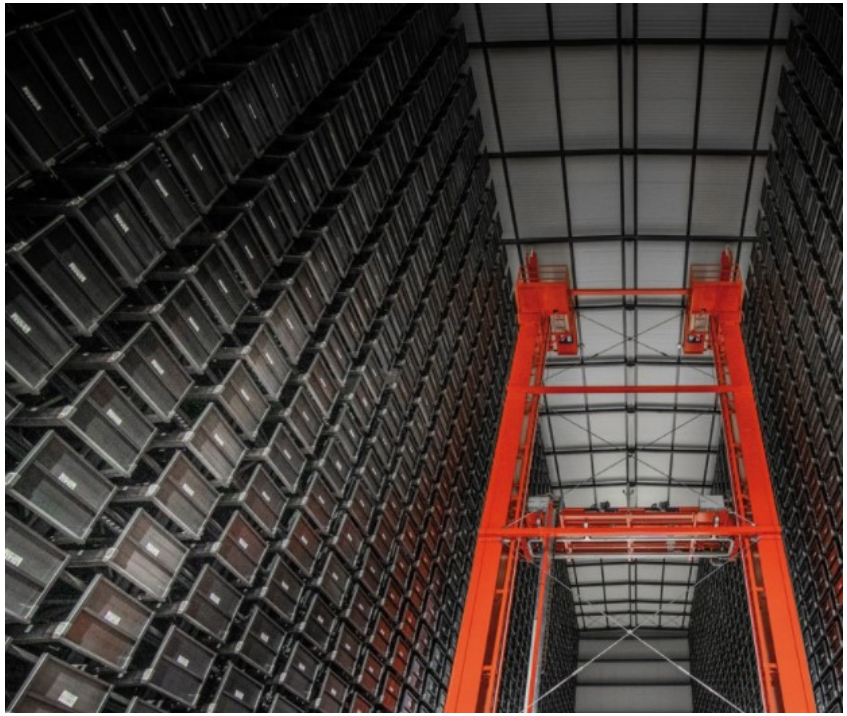

Our approach
to the implementation of turnkey projects:

1. Work on the project begins with a visit to the factory
2. In accordance with the plans of the premises, a 3D project is made in real scale,
3. The plant is completely manufactured, assembled and tested in the presence of the customer at our production site in Italy (with connection of all energy sources: water, steam, compressed air, etc.).
4. The equipment is packed together with pipelines and sent to the Customer.
5. The plant is assembled on site as a constructor, with little or no welding. Thus, installation and launch

fraugroup
foodandbeverageprocessing

Our company is part of the Ecor group of companies (www.ecor.com) which specializes in the production of stainless steel products. FRAUGroup, being part of the Ecor group of companies, uses stainless steel produced by our group of companies, which allows us to guarantee our customers 100% quality stainless steel made in Europe at a competitive price and reduce production times.

YouTube

Many of our installations can be found online.

Below are some examples,
which we are pleased to offer you:

- Complete line for the production of milk, yoghurt, cheese, butter
  https://youtu.be/0Vi1pxlKf28

- Complete Fully Automatic Ice Cream Production Line
  https://youtu.be/f3UKDCsWVKA

- Complete line for the production of sterilized milk, juices, drinking and classic yogurt with a capacity of 5000 liters / hour
  https://youtu.be/Twj58QR9bSk

Our task is the high quality of the proposed solutions, their personalization, compliance with delivery dates, technological support of the client before, during and after the launch of the equipment.

Our result is clients who successfully implement projects and return to us with new orders..
